

Little Kanawha Conservation District 2006 EQIP ENVIRONMENTAL RANKING CRITERIA

Name: _____ Tract #: _____

Address: _____ Date: _____

Priority Concerns of LKCD are as follows:

- _____ Water Quantity and Quality for livestock (Ranking Criterion # 1)
- _____ Water contamination by pathogens and sediment (Criteria # 2, 3, & 4)
- _____ Plant Productivity & Suitability (Ranking Criteria # 5& 6)
- _____ Soil erosion (Ranking Criterion # 7)

(Evaluator is to place check mark next to primary resource concern upon completion of evaluation sheets.)

Environmental Ranking Criteria for acres submitted into an EQIP Contract for the Little Kanawha Conservation District. Points can only be earned when there is an environmental concern to be addressed by the implementation of a Conservation Management System. If the applicant is already doing the conservation practice that eliminates an environmental concern, then points will not be assigned. Points will be awarded as written on the worksheet and not arbitrarily reduced. *(Selection for contract development is by ranking application from high point to low point applicant and selecting in descending order until allocation is exhausted.)*

Environmental *(Practice standard codes are in bold italics)*
Points

1. _____ **Develop approved sources of drinking water for livestock to reduce erosion, animal waste related problems, and to improve grazing management.**
(378,516,533,614,642,708)---(50 points)

2. _____ **Concentrated Winter Feeding - Improve water quality and provide for better utilization of animal waste nutrients** by relocating an established winter feeding area away from concentrated flow areas or streams or by constructing a waste storage facility: Select either "a" or "b". **Maximum of (40 points)**

- a. _____ Moving winter feeding areas away from streams to improve water quality. (Refer to 528 Winter Feeding System Supplement) (**NO** feed pad will be constructed)(***342,382,472,512,528,614,642,708***) (40 points)

OR

- b. _____ Establishing a concentrated winter feeding area and/or installing an animal trail or walkway, or heavy use area (***313,575, or 561***). (20 points)

3. _____ **Protect eroding stream banks and protect water resources.** Streambank erosion must be livestock related and the livestock must be excluded following stabilization. **(382 & 472)** ----- (30 points.)

4. _____ **Improve surface water quality** by implementing stream access and/or crossings for livestock or equipment. **(728)** ---- (10 points)

5. _____ **Improve soil quality, reduce erosion, improve animal health and increase forage utilization** by developing and implementing a prescribed grazing management plan. Land users must be given management worksheets so they understand the requirements of this practice. **(528) Maximum of 30 points.**

Points are as follows:

Managed continuous grazing----- (10 points)

Rotation grazing (5 to 8 days grazing cycle, 3 or more paddocks per management herd) ----- (20 points)

Managed intensive grazing (1 to 4 day grazing cycle, may require 8 or more paddocks per management herd) ----- (30 points)

As part of the grazing management of the operation, additional points may be earned by doing the following:

5a. _____ **Develop and implement a nutrient management plan and/or waste utilization plan** to improve water quality and plant species. Soil samples will be taken at the beginning of the contract and presented to the NRCS office. Nutrients will be applied according to a Nutrient Management Plan and will be based on the soil test results, the forage species, and the pasture management system. **(528***)** ----- (10 points)

5b. _____ **Excluding livestock from woodland.** **(472)** — (20 points)

5c. _____ **Establish warm season grasses (512) and/or Improve or establish a higher quality forage by seeding.** **(528***, 512***)** - (10 points)

5d. _____ **Frost Seeding ---Legumes only (528***).** ----- (5 points)

5e. _____ **Install pasture division fence (382)** ----- (20 points)

****The maximum number of acres eligible for soil amendments, or frost seeding cost share on any one contract will be capped at 25% of the eligible grazing land or 40 acres—which ever is greater.*

6. _____ **Reduce excessive erosion from Class 6 or Class 7 grassland or critically eroding areas** by a land use conversion to woodland by natural regeneration **(382 & 472)** ----- (25 points)

7. _____ **Soil loss reduction (342, 382,468,561 & 587)** Reduction of ephemeral/gully erosion.
Maximum of 20 points.

Reduce average erosion >1000 cu. ft./yr. (20 points)

Reduce average erosion 500 – 1000 cu. ft./yr. (15 points)

Reduce average erosion 300 – 500 cu. ft./yr. (10 points)

8. _____ **If plan is done to Resource Management Level ----** (20 points)

9. _____ **The producer has never received assistance under the EQIP program--**(10 points)

10. _____ **Landowner agrees to apply for CREP or other Farm Bill Programs.** (20 points)

_____ **TOTAL POINTS = 320**
